Radio Interface Cable Assembly

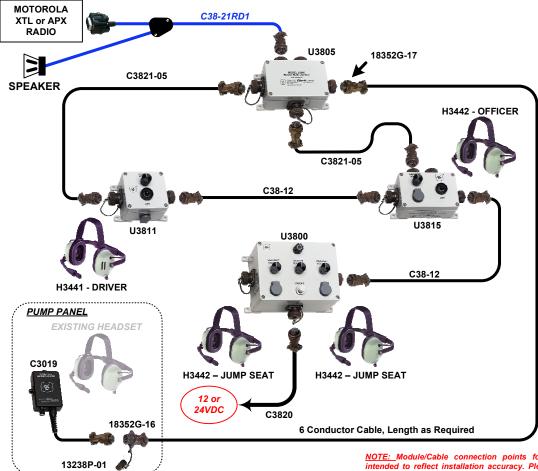

Series 3800 System to Motorola XTL or APX Series Radios Model No. C38-21RD1 (P/N: 18747G-48)

Product Bulletin

The C38-21RD1 Radio Interface Cable Assembly is designed to facilitate greater ease of installation of David Clark Series 3800 Vehicle Intercom Systems. It is a turnkey assembly allowing direct connection between any Series 3800 Radio Interface Module and mobile radios in the Motorola XTL or APX families, and affording various configuration options (i.e., fixed or variable radio receive audio, transceiver or remote head connections.)
