

Radio Interface Cable Assembly

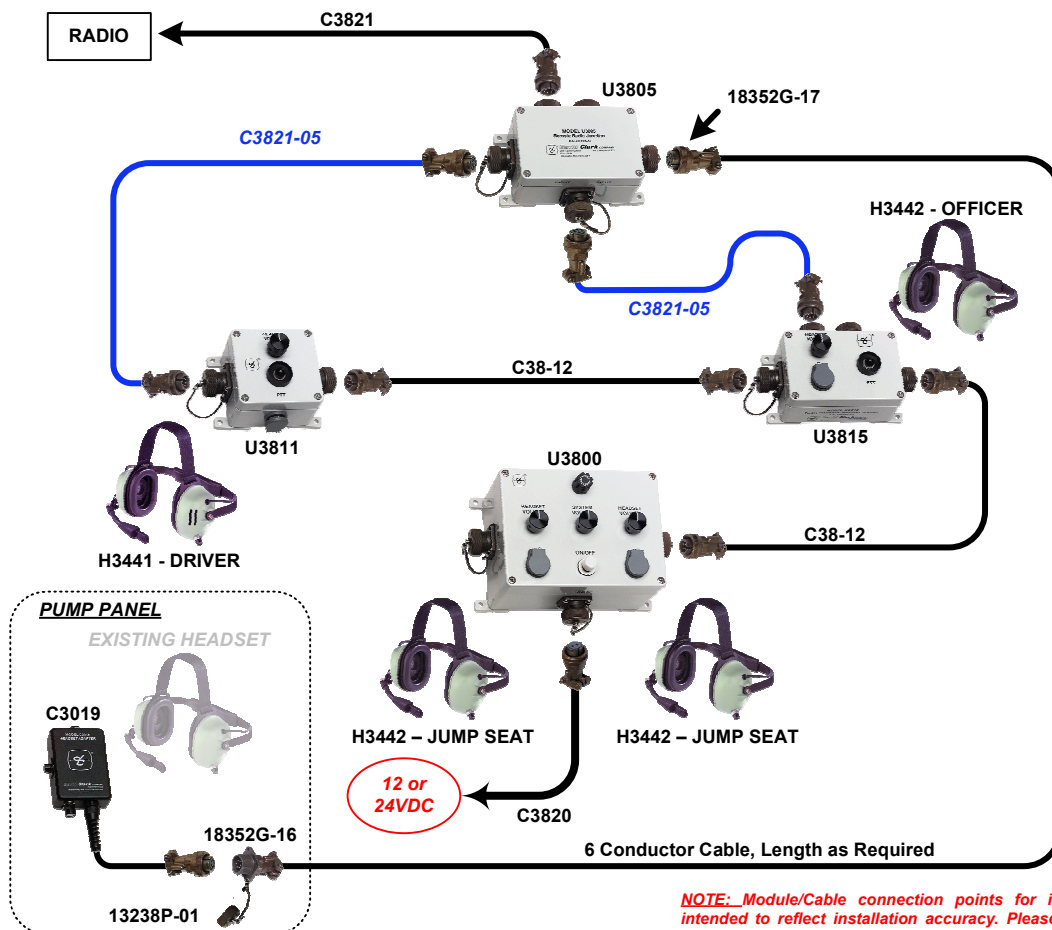

Connects U3805 and Series 3800 Radio Interface Modules
 Model No. C3821-05 (P/N: 18747G-47)
Product Bulletin

The C3821-05 Radio Interface Cable Assembly is designed to facilitate greater ease of installation of David Clark Series 3800 Vehicle Intercom Systems with a system design calling for more than two individual connections for radio interface. It is a turnkey assembly allowing direct connection between a Series 3800 Radio Interface Module and the U3805 Radio Junction Module, with no connector soldering required by the installer.
