

David Clark Company Series 6700 Radio-Direct Headsets afford clear communications and effective hearing protection for high-noise environments. H6700 Series Headsets carry worldwide FM Approval for those areas that require Intrinsic Safety ratings, while providing the same rugged durability you've come to rely on from David Clark Company.

Radio Direct (Hard Wired Version)

KEY APPLICATIONS

Oil / Gas

Factory / Industrial

Explosives / Construction

KEY FEATURES

- Stainless Steel Hardware
- Available both hardwired and with interchangeable comm cords (see page 2)
- Certified NRR: 23dB (noise attenuation)
- Undercut, Comfort Gel/Foam Ear Seals
- Water Resistant Foam and Wind Screen
- Wear with or without hard hats and helmets
- Improved 20-20kHz earphone
- New Over-Molded Boom Assembly
- Radio specific connector
- IP 68 rated PTT Button on the ear cup with rubber cover to protect from sand in fracking operations.

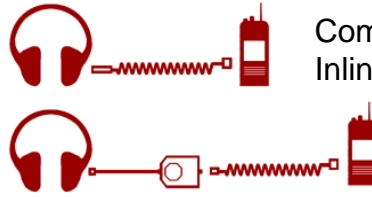

WARNING: The Series 6700 is intrinsically safe (IS) when connected to an IS approved radio. When connected to an IS approved radio, the resulting IS level is that of the lowest of the two. When connected to a non-IS radio the resulting system is not IS approved.
