## Wireless VOX Belt Station (Intercom Only)

(Model: U9913-BSW; P/N: 40992G-07)

Compatible with all Series 9900 Wireless Gateways

**Product Bulletin**

The David Clark Company U9913-BSW Intercom-Only VOX Belt Station is designed as a wireless interface, or portable part, between a Series 9900 Headset and a Gateway, where the user is designated to communicate only over the intercom system, as opposed to any external device to which the system may be connected, such as an aircraft interphone or mobile radio.

### KEY FEATURES

- Hands-free, full-duplex, voice-activated (VOX) intercom
- DECT based technology
- Secure signaling, no unwanted interception and/or cross talk
- Out-of-range warning scheme (patent pending), provides audible alert when approaching, but prior to reaching, the range limit
- VOX rotary adjustment, with large PTT for VOX override
- VOX “helper” tone for guidance to optimal VOX setting in any high-noise environment
- Rubberized protective skin (oil, water, UV, impact resistant)
- Marine-grade, water-tight enclosure, rugged and reliable
- Audible voice prompts for link status and battery life
- Removable/replaceable Li-Polymer battery, 24 hours continuous usage per charge (2-3 hours)
- [EU version, Model U9913-BSW\(EU\), p/n 40992G-17](#)
